Erratum: Heritable GATA2 mutations associated with familial AML-MDS: a case report and review of literature

Juehua Gao^{1*}, Ryan D. Gentzler², Andrew E. Timms^{3,4}, Marshall S. Horwitz³, Olga Frankfurt², Jessica K. Altman² and LoAnn C. Peterson¹

After the publication of this work [1], it was brought to our attention that the correct annotation at the protein level for one of the two reported GATA2 mutations is T358N (p.Thr358Asn), but not T358K (p. Thr358Lys), as the forward and reverse sequencing in Fig. 2b were swapped leading to the previous incorrect annotation.

Submit your next manuscript to BioMed Central and we will help you at every step:

- We accept pre-submission inquiries
- Our selector tool helps you to find the most relevant journal
- We provide round the clock customer support
- Convenient online submission
- Thorough peer review
- Inclusion in PubMed and all major indexing services
- Maximum visibility for your research
